Interactive Play is a Division of VPC Fiberglass®

WHY INTERACTIVE PLAY

- A NEW KIND OF WATERPARK -

Guest Controlled Features

While other waterpark systems operate on water volume alone, our parks are designed to be an interactive wonderland. Kids have a blast pulling levers, activating motion sensors, and pressing buttons to trigger thrilling water effects!

Water Battle Zones

Our features **encourage social interaction**. Whether it's competing in water battles or collaborating to create an explosive water display, interactive elements foster connections and shared experiences.

Explosive Water Thrills

Interactive Play's water features combine water flow with **pressurized air** to achieve IMPRESSIVE water effects!

Tech Kids Love

We are constantly innovating our features to keep kids engaged. We've recently added fixtures that visually come to life, with light-up bars in captivating hues that "fill up" and change to an electrifying shade of green when our water cannons are ready to be released!

Effortlessly Operated

What truly sets Interactive Play apart is our user-friendly interface. Designed with simplicity in mind, our system requires minimal training, allowing teams to efficiently manage the waterpark without the hassle of complex operations. This **saves time** and **reduces operator costs**.

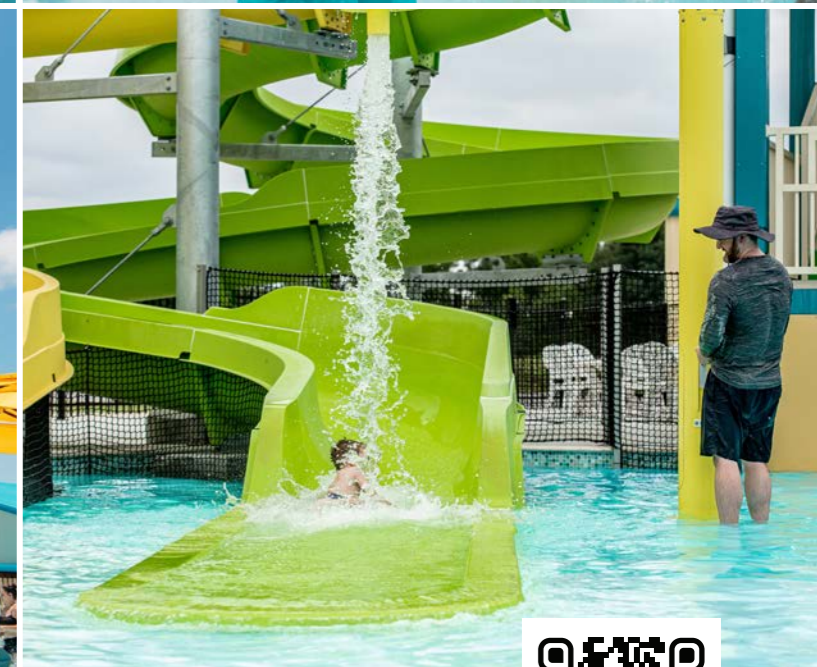

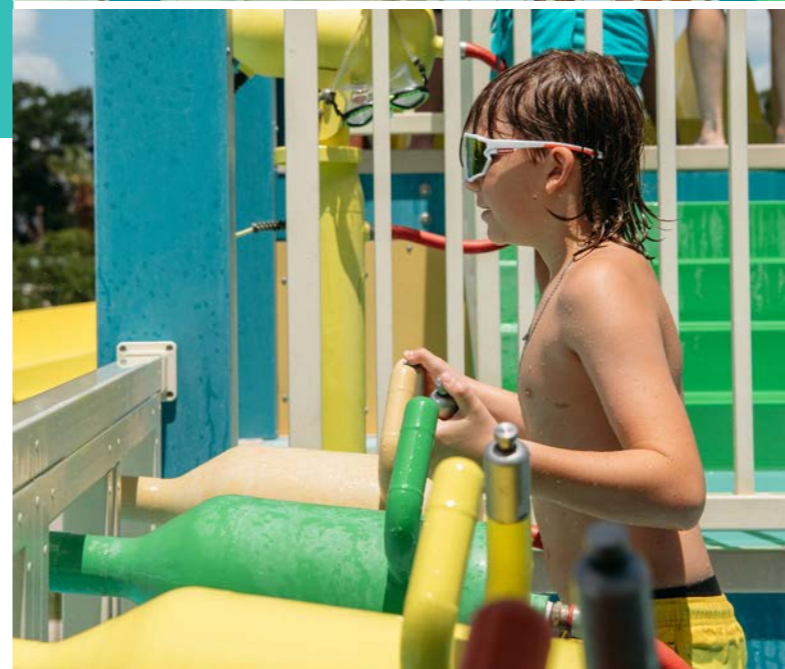

Premium Manufacturing

Our play structures are designed, engineered and **manufactured in the United States (Lockport, New York.)**

Built to Endure: No more rust and wear. We've chosen fiberglass for our MLPS frame, decking, I-beams, railings, stairs, and enclosure panels, guaranteeing unmatched corrosion resistance.

High-End Finishes: We employ glass bead-blasting on all manifolds and surface passivation on all non-coated stainless steel features, ensuring longevity and resilience.

Interactives That Last: Take quality to the next level with our industrial-grade irrigation valves. These interactive features are designed to provide endless fun and are rigorously field-tested for both repetition and longevity.

Watch This Park in Action!

ABOUT INTERACTIVE PLAY

- A NEW KIND OF WATERPARK -

Designed for Fun. Built for Safety.

The Interactive Play product is engineered for minimal maintenance and designed to exceed industry standards. Our solution is safe and remarkably easy to operate.

Fully Customizable!

We offer complete customization for your selected play structure model, or we can create a one-of-a-kind design tailored specifically to your park. **Your imagination is our drawing board!**

We handle:

- **Design & Conceptualization**
We provide beautiful 3D renderings of your project.
- **Manufacturing & Installation**
- **Testing & Certification**
- **Post Sales Service**
Because everything is run through a cloud based interface we can assist with troubleshooting issues at your park remotely and can perform maintenance on-site if necessary.

A WATERPARK THAT'S TOTALLY LIT

- EPIC WATER FEATURES -

BOOM. SPLASH. BURST

- JUST A FEW OF OUR POPULAR INTERACTIVES -

Thump Pump

Push down for loads of fun.

Whitewash

In just **one pull of the rope** create a shower and make a splash!

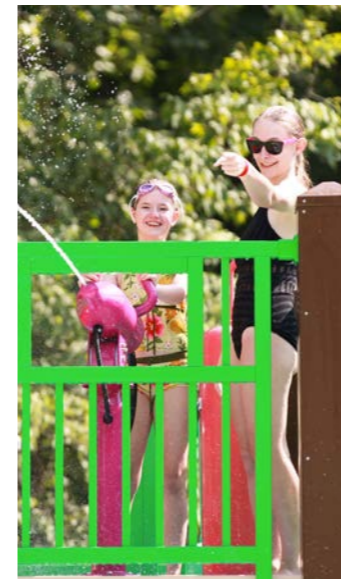

The Wee Womper

May be short, may be small but can really **drench 'em all!**

Pour Over

Pull a fast one; and plan for a splash!

Rusher

Push down and aim! Its where the playful battle begins!

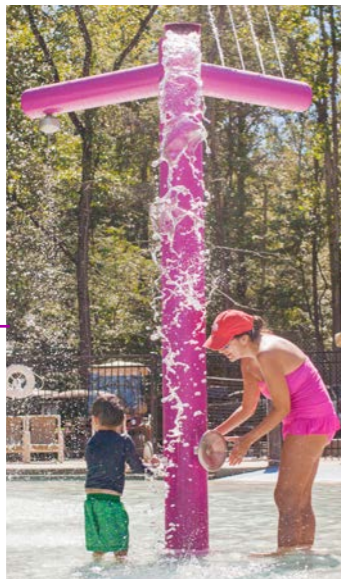

Wobble Neck

Not your typical garden hose - **this one's packed with force!**

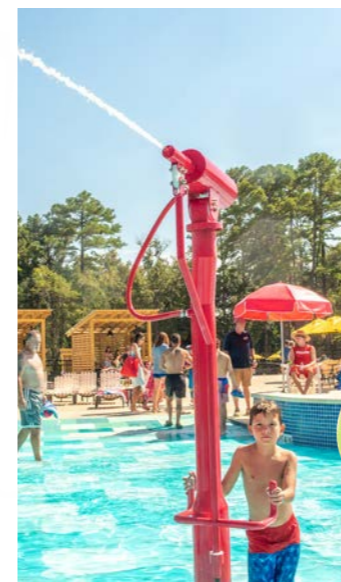

Three Tree

Turn the water wheel to see how each branch sprays water in different ways!

Triple Buzz

Motion sensors buzz out water in unexpected ways.

Beanstalk Blaster

Elevate your spray performance with this tall-necked water gun, **point, swivel and push** to direct the spray at your target.

Rain Maker

Work together and pump the water way up high.

THE POWER PLUNGE

- EPIC WATER FEATURES -

Behold our impressive water feature, The Power Plunge!

This colossal water wonder holds a staggering 750 gallons of water and reaches a height of approximately 30 feet, promising kids a larger-than-life adventure. With each passing moment, the upper barrel steadily fills with water, building anticipation and setting the stage for a water show like no other. Once the barrel is brimming with water, an air-powered cylinder springs into action at the sound of a train whistle, gracefully lifting the barrel shell and allowing a breathtaking 360-degree spray of water to burst forth!

750

gallons of excitement

360

degree water spray

30

foot tall structure

From day one, the Interactive Play structure has been a major hit. The sheer excitement in not only the children's eyes but the adult's as well is a fantastic thing to experience first-hand. Children and adults of all ages can cut loose and enjoy the wonderful interactives and slides. The Interactive Play structures are built to last and hold up against the test of time. Great product, excellent customer service, and a company you can rely on.
